| Course Level::     | Level 6                                                                                                                                                                                                                               |
| Valid From::       | 2025/2026 Sem 1                                                                                                                                                                                                                       |
| Credits::          | 15                                                                                                                                                                                                                                    |
| Owner:             | School of ICT                                                                                                                                                                                                                         |
| Assessment Method: | Achievement                                                                                                                                                                                                                           |
| Course Aim         | To provide students with a detailed knowledge of Database Management Systems used in modern IT organisations. The course will focus on one widely used commercial database, Oracle, and provide students with market relevant skills. |

| CILO                                                      |                                                                                                     |
|-----------------------------------------------------------|-----------------------------------------------------------------------------------------------------|
| On Completion of this course, the learner will be able to |                                                                                                     |
| #                                                         | Learning Outcome Description                                                                        |
| 1                                                         | Demonstrate detailed knowledge of core database and database design concepts.                       |
| 2                                                         | Perform data modelling to produce logical data models using ERD techniques and normalization        |
| 3                                                         | Design and implement a database suitable for an information system                                  |
| 4                                                         | Use Structured Query Language to perform database operations                                        |
| 5                                                         | Discuss the principles, regulations and laws related to privacy both in the GCC and Internationally |
| Requisites                                                |                                                                                                     |
| No requisites                                             |                                                                                                     |

|                                           |
