

APPROVED

IT8341: Software Defined Networking

Course Details

Course Code:	IT8341
Course Title:	Software Defined Networking APPROVED
Short Title:	SDN
Course Level::	Level 8
Valid From::	2026/2027 Sem 1
Credits::	15
Owner:	School of ICT
Assessment Method:	Achievement
Course Aim	To equip students with the knowledge and skills to design, configure, and manage scalable, secure SD-WAN architectures. Students will learn to transition from traditional WANs to SD-WAN, deploy and configure WAN Edge devices, apply intelligent policies for performance and security, and troubleshoot real-world networking challenges.

CILO	
On Completion of this course, the learner will be able to	
#	Learning Outcome Description
1	Explain the core and specialist theories, principles, and architectures underlying SD-WAN
2	Implement advanced SD-WAN solutions by configuring controllers, WAN Edge devices, and policies for scalability and security
3	Evaluate complex SD-WAN network performance and operational issues using analytical tools and evidence-based methods.
Requisites	
Pre Requisite: IT8323	

Examinations
Assessment Type Examination (Unseen)
Assessment Type Examination (Practical)
No Other Controlled Assessments
Uncontrolled Assessments
Assessment Type Project (Group)
